

## **ALARKO CONTRACTING GROUP ENVIRONMENTAL MANAGEMENT POLICY**

Alarko Contracting Group, which operates in the area of construction contracting both domestically and abroad, accepts protecting nature and the environment and not harming it in all its workplaces and all kinds of activities, together with all its employees, expert teams and sub-industry, as one of its basic principles and undertakes to adopt sustainable practices.

Alarko Contracting Group systematically examines all its activities, all products and services it procures, designs, produces and uses, from a life cycle perspective, in terms of their possible negative and positive effects on the environment, and organizes its activities to take the necessary precautions in advance.

It informs and trains its employees on this issue and ensures that all employees have environmental awareness. It accepts complying with national and international legislation and customer/specification requirements regarding environmental protection and following technological developments as a minimum responsibility.

In all its activities, it takes the necessary precautions to protect natural assets and historical artifacts, not to negatively affect living life, to prevent water, air, noise and soil pollution, to leave the environment as it was found and even to improve it in a positive way.

It aims to increase energy efficiency, optimize waste management and protect natural resources. It aims to reduce the carbon footprint in its projects, minimize the amount of waste by choosing recyclable materials, and protect the ecosystem by applying environmentally friendly construction techniques. It applies methods and ways of working that will reduce the consumption of natural resources such as energy, water and paper. It aims to reduce the amount of waste produced and to collect waste separately and recycle it.

It evaluates all suggestions and complaints directed to it in this regard, it takes the necessary measures and informs the public.

In order to achieve its targets regarding the Environment, Alarko Contracting Group carries out, reviews and develops its Internal Audit, Performance Measurement/Monitoring methods, reporting systematics and practices and aims to continuously improve the management system it has established.

This policy is constantly reviewed to ensure its compliance.
